

I am sending home a packet of materials for you to work on over the "break." Please do not wait until the last moment. Try and spend at least 20-30 minutes a day working on these readings, handouts, etc. PS, there is no particular order, except for the chapter readings and questions (13, 14, 15, 26.) If you get confused you may email me.

Sincerely,
Morton

- Do the word find. 1 class period.
- Read chapters (YOU MUST READ FIRST!) 13, 14, 15, 26. Answer the attached questions in complete sentences. 4 class periods.
- Practice the Asia maps. Do what you can before looking online. 3 class periods.
- 2 US map tests. Practice online as much as you need to. When you are ready correctly place the 50 states. These are tests. 2-3 class periods.

Money, Money, Money

RESOURCE PAGE 6

United States Industry and Resources, 1920

Directions: By 1920, the United States was a leading manufacturing nation. Part of the reason for this success was the nation's abundant natural resources and well-developed rail system. Study the map, and then answer the questions.

1. What states were centers of automobile production and related industries?

2. What states were centers of iron and steel production?

3. Two resources needed to make steel are iron ore and coal. Pittsburgh, a center of steel production, is in a coal region. Describe a route, by water and rail, over which iron ore could be sent to Pittsburgh from the Midwest.

4. Explain why Chicago's location made it an important center for industry and transportation.

Name _____ Date _____
